

Your Year Ahead

Use this tool to help you plan the next 12 months. Include all aspects of life - if you already have specific commitments that will occupy a lot of time/energy, include those first. Then think about the flow of your year and map out your priorities, including work priorities and life priorities (holidays should be in there if they are important to you). Aim to have no more than two-three areas each month.

December 2020

January 2021
